Sensus and Solekai Systems Formalize Development Partnership

27 July 2009 – San Diego, CA – Solekai Systems Corporation (Solekai) today announced a development partnership with Sensus, the provider of the FlexNet Advanced Metering Infrastructure (AMI) System. Solekai, a San Diego-based engineering services company, will work closely with Sensus to assist in the development, deployment, and testing of the FlexNet Smart Grid solution. In addition, Solekai will work closely with Sensus customers to assist with the integration of the FlexNet solution with each customer's existing enterprise software.

With FlexNet, Sensus has created the electric utility industry's most powerful AMI solution. FlexNet meets AMI requirements for ubiquity, redundancy, security, and demand response for the emerging smart grid. Martin Caniff, the President of Solekai, says, "FlexNet truly raises the bar in enabling Smart Grid functionality for electric utility companies. The Solekai partnership with Sensus enables us to leverage our software development expertise and contribute to this exciting new wave of the future".

Bill Yeates, Sensus Executive Vice President Conservation Solutions, explains that Sensus and their FlexNet customers benefit from the high level integration work that Solekai continues to deliver. "Solekai has been a key player in the designing and testing of the FlexNet solution. We consider our relationship vital to the ongoing projects we're engaged in."

About Solekai Systems Corporation

Solekai Systems Corporation is a software engineering services and solutions company specializing in design, development, integration, and testing for digital video, DoD and Smart Grid industries. Solekai's unique combination of broad technical experience and project management skills, together with a customer-focused approach enables Solekai to consistently deliver successful results. Visit www.solekai.com for more information.

About Sensus

Sensus is a time-tested technology and communications company providing data collection and metering solutions for water, gas and electric utilities around the world. Sensus is a transforming force for the utilities of tomorrow through its ability to help customers optimize resources, as well as to meet conservation and customer service objectives. Sensus customers rely on the Company for expert, reliable service in order to meet challenges and exceed goals. For more information, visit www.sensus.com.

About FlexNet®

FlexNet's open systems architecture combines powerful, industry-leading two Watts of radio power with crystal clear FCC-licensed radio spectrum and the latest industry standards for communications protocols and security to maximize systems performance and minimize operational costs in both dense urban and remote rural applications. FlexNet ensures sustainability, protecting the utility infrastructure investment with uninterrupted delivery. FlexNet endpoints are equipped with the ability to accept downloadable revised code; modulations, protocols, and frequency of operation. Data rates, system bandwidth, and communications protocols can be fully upgraded as future requirements and features are developed. Sensus FlexNet further mitigates risk by using APA™ (All Paths Always) technology; this ultimate form of self-healing ensures critical messages are delivered without re-routing delay.
